

# Wael Abidi

Full-stack Developer

 weedii |  Wael Abidi |  abidiw293@gmail.com |  +216 54052999

## PROFILE

---

Full-stack developer skilled in building web applications with experience in both frontend and backend technologies. Focus on creating reliable solutions that enhance user experience. Eager to contribute in a team setting.

## PROFESSIONAL EXPERIENCE

---

### Full Stack Developer at HOLMES IV (1 Year)

- Working across the entire technology stack including frontend, backend, and Azure.
- Developing and maintaining features using modern web technologies and Azure services.
- Collaborating with team members to implement scalable solutions.

### Freelance (1 Year)

- Developed web/mobile applications for various clients using JavaScript, Python etc.. frameworks.
- Contributed to UI/UX design and responsive web development for startup projects.

### Full Stack Developer Intern — Africatek (3 months)

- Developed web application with modern JavaScript frameworks and RESTful APIs.

## PROJECTS

---

### ● PDF Assistant Chatbot [GitHub](#)

- A small RAG project enabling users to upload PDFs and ask questions answered based on the file's content.
- Built using **Next.js** for the frontend and **FastAPI** for the backend, integrated with an LLM model.
- Users can interact with an AI assistant to get answers based on the PDF content.

### ● Swaphubu

- Crypto Trading Platform - Built full-stack exchange with real-time pricing with manual secure fiat-to-crypto conversions
- KYC Compliance System - Implemented automated identity verification using Shufti Pro API for regulatory compliance.
- FastAPI/Next.js Stack - Developed with Python backend, React frontend, PostgreSQL, and Docker containerization

### ● DumuGames [Live Demo](#)

- Digital marketplace for gift cards serving wholesale and retail customers.
- Built with the **MERN Stack** (MongoDB, Express.js, React.js, Node.js).
- Features include wallet system, order management, and comprehensive admin controls.
